MUSA GUMEDE

JUNIOR FULL-STACK DEVELOPER

Junior full-stack developer with experience building end-to-end web applications. Translates requirements into functional features, writes clean code, and collaborates effectively within teams. Comfortable working across frontend and backend, troubleshooting issues, and delivering reliable, usable solutions.

SELECTED PROJECT EXPERIENCE

LocalConnect SA | Team Project
Learnership Programme

A business discovery platform that enables users to find, review, and trust local South African businesses while allowing business owners to manage their online presence.

Key Contributions

- Implemented state management for efficient data handling
- Developed the business verification workflow
- Defined API contracts/types, services, repositories, and error handling
- Built the business dashboard and analytics UI.

Technology Used

Git & GitHub, Angular, Sprint Boot, PostgreSQL, Figma, Tailwind, draw.io

SOFT SKILLS & WORK READINESS

Best Overall Strength | Problem Solving

Consistently breaks down complex tasks into manageable steps, identifies root causes, and works through solutions logically rather than escalating prematurely.

Most Improved Skill | Communication

Over time, she improved her ability to explain ideas clearly, ask precise questions, and share progress early, improving collaboration with teammates and facilitators.

SHAPER REVIEW

Musa has excellent presentation skills and communicates ideas clearly and confidently. She demonstrates strong analytical ability and is proactive in questioning ideas to develop better approaches. With an innovative mindset and strong leadership skills, she solves problems in a structured manner and takes pride in the quality of her work.
